

Everything You Need to Ace Chemistry in One Big Fat Notebook (Big Fat Notebooks): 1 By Jennifer Swanson Best part of it all I passed my chemistry final exam!!! Im so happy!!! class=a span9 a align center prodDetSectionEntry> Engelska Not ideal for secondary school students in 5th year as it missing some infor but it still really good would advise for people who want to chemistry class=a span9 a align center prodDetSectionEntry> Engelska My kids enjoy studying these books for fun. Totally recommend no matter your age! class=a span9 a align center prodDetSectionEntry> Engelska

A lively fully illustrated guide to acing secondary school chemistry with clear notes on the big ideas helpful tips for memorizing processes and remembering definitions and lively doodles that make science easier to understand (and fun to study).

I'm failing that class right now... class=a span9 a align center prodDetSectionEntry> Engelska This was a good purchase and it helped a lot, They are 5th and 7th grade but they will continue to enjoy it into their later school years; class=a span9 a align center prodDetSectionEntry> Engelska I bought all of these so far and my latest addition is the Chemistry one. Great books that give a proper overview of each subject in an excellent way that helps the reader remember all the important things afterwards. I have to admit I'm a long way away from my high school years and chose these aa a fun book to read that helps me pass my time in an educational way, Everything You Need to Ace Chemistry in One Big Fat Notebook (Big Fat Notebooks): 1The chemo one is awesome love it aced my tests! Waiting for a physics one.

. It had everything I learned in chemistry d in order. They explain the concepts they've learned with great excitement
