

Een zelfgekozen einde (Dutch Edition) By Jesse Bering

## Kindle Een zelfgekozen eindeks

“Suicide and the Holocaust” (2005) suicidologist David Lester reported that suicide deaths were high in the Jewish ghetto’s and concentration camps but either not reported or under reported by Nazi guards. **Een zelfgekozen eindemarkering** Following the release of the Goethe classic novel “The Sorrows of the Young Werther” (1776) the book was banned in several European countries due to the increase of suicide deaths copied from the book. **EPub Een zelfgekozen einder** من الآن وحتى الوقت الذي تنتهي فيه من قراءة الفقرة التالية، سيقدر شخص ما، في مكان ما، أن الموت هو خيار أفضل من التنفس مرة أخرى ، وسوف يُزيل نفسه بشكل دائم من هذا العالم. **Book Een zelfgekozen eindeutig** This was followed by a collection of his Webby award nominated essays Why Is the Penis Shaped Like That? (Farrar Straus and Giroux 2012) and Perv (2013 Farrar Straus and Giroux) a taboo breaking work that received widespread critical acclaim and was named as a New York Times Editor’s Choice. **Book Een zelfgekozen eindex** This was followed by a collection of his Webby award nominated essays Why Is the Penis Shaped Like That? (Farrar Straus and Giroux 2012) and Perv (2013 Farrar Straus and Giroux) a taboo breaking work that received widespread critical acclaim and was named as a New York Times Editor’s Choice. **Psychology Een zelfgekozen indecker** He has also been featured in numerous documentaries and radio programs including Through the Wormhole with Morgan Freeman Conan Chelsea Lately QA (Australia) and NPR’s All Things Considered. **Book Een zelfgekozen indecker plane** Is de ontvankelijkheid voor zelfdoding een uniek evolutionair gegeven van onze soort? Op basis van persoonlijke verhalen journalistiek onderzoek en de meest recente wetenschappelijke kennis probeert Jesse Bering de suïcidale geest te doorgronden. **Book Een zelfgekozen eindex** However the book’s episodic nature jumps from the police’s difficulty of determining suicidal intent conclusively to whether animals commit suicide to pure scientific research about brain chemistry. **Book Een zelfgekozen einder funeral** Psychology Science Nonfiction - All the inconveniences in the world are not considerable enough that a man should die to evade them; and besides there being so many so sudden and unexpected changes in human things it is hard rightly to judge when we are at the end of our hope...Michel de Montaigne A Custom of the Isle of Cea (1574) This is quite a good book on the topic of suicide which seems to be a hot topic this year with all of the people we have lost to it. **Book Een zelfgekozen eindex masfak** Written by an author who personally has had issues with it so he knows whereof he speaks and has also done his homework so it makes for very interesting reading on this fascinating subject. **Nonfiction Een zelfgekozen eindeutig** Psychology Science Nonfiction As a gifted academic research psychologist and professor at Otago University (New Zealand) Jesse Bering is a bestselling author his books have been translated in several languages. **Een zelfgekozen einde science museum** With about one million deaths (globally) each year it is important to understand suicidal ideation in its various forms and patterns the heartbreak and grief of survivors many are compelled to seek and search for answers to understand this deadly final act. **Een zelfgekozen eindemarkering** Throughout the book Bering shares his personal story: beginning as an anxious gay teen Bering then had a rewarding grad school education waves of accomplishment excellence in combination with crushing academic disappointment and defeat; and later more impressive success and authorship. **Een zelfgekozen eindewege** Excellent research is combined with scientific and academic findings literature true stories from survivors and family members also the subject of animal suicide make for some interesting and fascinating reading. **Science Een zelfgekozen eindex masfak** During war time there is a considerable drop in suicidal deaths: the same statistical decline in America was noted following the assassination of JFK the Challenger Space Shuttle and the 9/11 attacks. **PDF Een zelfgekozen eindeutig** ” Viktor Frankel attributed the Jewish survival rate and lack of suicide deaths from the horrific conditions of the Nazi concentration camps to the “innate human ability to find purpose in life. **Een zelfgekozen eindex luzern** Often depressed missing individuals are last

seen on beaches relatives plead with the public for any information; when the bodies are found “No foul play suspected” is listed on the official report. **Een zelfgekozen eindemarkering** However if an individual is determined to conceal suicidal thoughts or intent to avoid intervention or hospitalization even a skilled psychiatric mental health professional would be unable to detect a possible suicide attempt/death. **Psychology Een zelfgekozen eindecker** In a large psychiatric clinic The Implicit Association Test (IAT) a five minute computer program that flashed images and words across the screen was a more accurate predictor of people with suicidal risk over doctor interviews The development of new technologies are highly promising in suicide education and prevention. **Psychology Een zelfgekozen eindex masfak** He wrestles with the difficult questions about suicidal contagion--that is whether some individuals are more likely to attempt suicide after exposure to suicide in literature in film or in the news. **Een zelfgekozen indevaluatie ebc** Yes in more than one religion at some point in history suicide was or is considered a sin something that would prevent you from being favoured in the afterlife or something that might have negative ramifications. **Een zelfgekozen eindewege** He found that the youngest children were more likely to believe that the mind lives on than the older children and he draws this conclusion: this erroneous belief in the survival of personal consciousness after death is our species' 'default stance. **Book Een zelfgekozen einde 2e** Surely that's Nobel Prize worthy stuff no? He even goes on to liken being an atheist surrounded by the religious to being surrounded by people who are in the middle of a role-playing fantasy game and you can't get them to just be serious for a minute. **Een zelfgekozen eindewege autobedrijf** Science and faith are not mutually exclusive and plenty of great scientists and mathematicians throughout the ages have also been religious (Michael Faraday Gregor Mendel Isaac Newton - all dedicated Christians). **Book Een zelfgekozen einde 2e** I really wouldn't have seen this as a negative if it was presented as opinion but to arrogantly laugh in the face of the billions of people in the world who do believe that there is some form of life after death and call that belief erroneous? Blatantly unprofessional. **Book Een zelfgekozen eindecker** The afterlife is by nature an unfalsifiable concept a term of which I'm sure you know the meaning being that it's a term you would learn in first year uni as a psychology student. **Book Een zelfgekozen eindecker plane** To talk about religion as if it's everybody else off in fantasy land while you're sat there going Guys? Can we all come back to reality for a minute? Miss me with that shit. **Een zelfgekozen einde psychology degree** There was a whole chapter dedicated to faith and suicide and for a pretty big chunk of it I was thinking yeah I might just skip this chapter because at this point he's just telling me that religion is a fairy tale and that's not the content I signed up for when reading a book about suicidality. **Book Een zelfgekozen eindecker plane** Statistically someone takes their own life every 40 seconds plenty of these cases are linked to psychiatric conditions but plenty aren't and that's the everyday person dealing with suicidal thoughts. **Book Een zelfgekozen einde** These statistics probably mean we know someone who has died by suicide (am careful to use the term committed suicide - which the book also delves into in some great detail) they are shocking statistics to me and this is why I ask myself the question why would a person choose to end their life where do they get the guts how? etc etc As with everything that involves how the human mind works the answers are never satisfying. **Book Een zelfgekozen eindex** With real-life examples you get to journey with those who have successfully suicided (a verb that's also acceptable in the English language) and those who were unsuccessful in their attempts. **Book Een zelfgekozen einde** And for those who have to live with the fact that someone close to them decided to end their lives the book will offer some understanding as to why and maybe that will help you deal with the situation even slightly better. **Een zelfgekozen einde pdfescape** It seems most have an immunity built up against suicidal ideation and suicide which pushes it deep into a dormant stage only to be awakened in extreme contexts or in a cultural memetic moment. **Book Een zelfgekozen einde** I live on not because life may be joyous tomorrow (even though it surely will at some point) but because I cannot imagine contributing to someone else's a loved one or otherwise existential horror. **Kindle Een zelfgekozen einder** The “Werther Effect”-- the phenomenon and contagion of copy-cat suicide was explored in length. **Book Een zelfgekozen eindeutig** The controversial Netflix series “13 Reasons

Why..." (2017) teen Hanna Barker committed suicide because she felt she was badly treated by others. **Book Een zelfgekozen eindex masfak** The disturbing scenes of her death were compared to horror movies, **Book Een zelfgekozen einder funeral** The concern of prevention specialists raised alarms over the risk of the show being aimed at impressionable vulnerable teens, **EBook Een zelfgekozen eindex** In order to show an "honest" portrayal television executives ignored scientific data: **Een zelfgekozen eindeutig zweideutig** The online media.

## Book Een zelfgekozen einde

Nonfiction **Een zelfgekozen einde science museum** على صعيد عالمي، يُقتل مليون شخص أنفسهم سنويًا، ويحاول ملايين آخرين القيام بذلك ربما يكون هذا الرقم متحفظًا للغاية؛ بسبب وصمة العار ومطالبات التأمين الباهظة، أي أنه قد من المعروف أن حالات الانتحار ومحاولات الانتحار لا يتم **Een zelfgekozen eindemarkering** يكون أكبر من ذلك ومع ذلك، **Een zelfgekozen indevaluatie wia**، الإبلاغ عنها بشكل كافٍ عندما يتعلق الأمر بالإحصاءات الرسمية **Book Een zelfgekozen eindex** Jesse BeringA Very Human EndingTranslated By #Maher\_Razouk Psychology.

## Een zelfgekozen eindexamens 2023

Jesse Bering is an experimental psychologist and a leading scholar in the cognitive science of religion, **Book Een zelfgekozen einder funeral** He is also an essayist and science writer specializing in evolution and human behavior. **Een zelfgekozen einde science museum** Norton (2011) was included in the American Library Association's Top 25 Books of the Year and voted one of the "11 Best Psychology Books of 2011" by The Atlantic, **Book Een zelfgekozen einder funeral** His most recent book was A Very Human Ending (Do Jesse Bering is an experimental psychologist and a leading scholar in the cognitive science of religion. **Kindle Een zelfgekozen eindex masfak** He is also an essayist and science writer specializing in evolution and human behavior, **Een zelfgekozen eindemarkering** Norton (2011) was included in the American Library Association's Top 25 Books of the Year and voted one of the "11 Best Psychology Books of 2011" by The Atlantic, **Book Een zelfgekozen eindex masfak** His most recent book was A Very Human Ending (Doubleday 2018): **Een zelfgekozen eindeutlich** Bering's writings have been translated into many different languages and reviewed in The New York Times The Guardian The New Yorker The Atlantic and many other outlets. **EPub Een zelfgekozen einde 2e** Bering is Director of the Centre for Science Communication at the University of Otago. **Een zelfgekozen einde science museum** He lives in Dunedin New Zealand with his partner Juan and their two cheeky border terriers Hanno and Kora, **Een zelfgekozen indevaluatie ebc** {site\_link} Jesse Bering was succesvol als wetenschapper en schrijver, **Een zelfgekozen eindemarkering** Toch moest hij tussen zijn dertigste en veertigste vaak aan zelfdoding denken: **Een zelfgekozen einde psychology degree** Met het vervagen van deze gedachten kwam bij hem de vraag op waarom de mens niet alleen suïcidale gedachten heeft maar er in sommige gevallen ook naar handelt, **Book Een zelfgekozen indeks** Toegankelijk persoonlijk diepgaand een boek als dit over zelfdoding was er nog niet. **Een zelfgekozen eindexamens 2023** Een zelfgekozen einde (Dutch Edition)Theories abound but few conclusions are reached in the interesting but ultimately disappointing Suicidal: Why We Kill Ourselves: **Een zelfgekozen einde psychology degree** Recently there has been a spate of celebrity suicides: Kate Spade Anthony Bourdain and Avicii (Tim Bergling), **Book Een zelfgekozen indecker** Despite having an outwardly successful life these people and many others over the years felt that suicide was the best choice: **EPub Een zelfgekozen einder** Suicidal: Why We Kill Ourselves attempts to answer that question using scientific studies and the author's own suicidal tendencies as a roadmap: **Een zelfgekozen einde pdfescape** For example 43% of suicides are

caused by genetics and 57% are caused by environment. **Book Een zelfgekozen einde** 90% of the genetic issues are mood disorders like depression or bipolar disorder, **Book Een zelfgekozen einder funeral** The worst risk is when a person genetically predisposed to suicide runs into one of the environmental issues like the death of a loved one or loss of a job. **Book Een zelfgekozen index masfak** Suicidal: Why We Kill Ourselves attempts to answer the “why are people suicidal” question. **Kindle Een zelfgekozen einder funeral** However the presentation of a multitude of theories many of them conflicting fails to provide a clear answer: **Nonfiction Een zelfgekozen eindeutig** The conclusion presents some interesting facts about prevention which answers only the “how are suicides done” question, **EBook Een zelfgekozen index** Readers interested in how to prevent suicide rather than why suicide occurs will enjoy this book: **Een zelfgekozen einde psychology degree** Also therapists or police officers interested in learning the results of studies of suicides would appreciate it: **Book Een zelfgekozen einder funeral** However it is not recommended for families dealing with a suicide that has already occurred as it will generate more questions than answers: **Een zelfgekozen eindemarkering** Also anyone contemplating suicide would be better served by reading one of the many self-help or therapeutic books on the subject. **EPub Een zelfgekozen indeks** Thanks to University of Chicago Press and NetGalley for an advance copy in exchange for an honest review, **Book Een zelfgekozen indeks** think of all the big names that have taken their lives recently and maybe the people you know personally too, **Science Een zelfgekozen index masfak** The book takes on the question of whether non-human animals commit suicide among many other issues, **Science Een zelfgekozen index masfak** Think of the dog who lays by his master’s grave refusing to eat or leave brokenheartedly awaiting his return. **Een zelfgekozen einder** It also discusses some unusual ways that people have used to commit suicide and delves into different studies and papers on suicide published by different scholars. **EBook Een zelfgekozen einder funeral** There’s a bit of something for just about any interest in the subject and it was worth a read, **Een zelfgekozen einde pdf merger** My thanks for the advance electronic copy that was provided by NetGalley author Jesse Bering and the publisher for my fair review, **Book Een zelfgekozen einde 2e** University of Chicago PressPub: Oct 30th 2018My BookZone blog:<https://wordpress>. **Een zelfgekozen einders educatie** In “Suicidal: Why We Kill Ourselves” Bering delves into what he calls the “specter of suicide”-- among the darkest moments of the human condition, **Science Een zelfgekozen index masfak** In addition Bering shares his deepest darkest moments and times with the “secrets” of suicidal impulses. **Book Een zelfgekozen einde** “To be rooted” observed Simone Weil “is perhaps the most important and least recognized need of the human soul: **Psychology Een zelfgekozen eindeutig** A 17 year old teen Victoria “Vic” McLeod left behind a detailed journal of four months of her crippling anxiety and suicidal thought process: **Book Een zelfgekozen einder** Vic ended her life after jumping from a 10 story building in Singapore (2014): **Een zelfgekozen einde kindle reader** Vic’s parents wanted to share their daughters story in order to help others: **Book Een zelfgekozen eindeutig** There was no discussion of the Aokigahara Forest (a suicide “hot spot”) located at the base of Mt, **Science Een zelfgekozen index masfak** However an Asian suicide epidemic began after the unusual “burning charcoal death” of Jessica Choi yuk-Chun a Hong Kong engineering executive (1998). **Book Een zelfgekozen eindeutig** In New Zealand (suicide was a crime until 1961) the rates of suicide deaths are high, **Book Een zelfgekozen einder funeral** This is not to conceal evidence but used as a proven tactic in suicide prevention, **Een zelfgekozen einde psychology** In the last part of the book the methods used and detailed in suicide prevention clearly saved lives: **EPub Een zelfgekozen einder funeral** With thanks and appreciation to the University of Chicago Press via NetGalley for the DDC for the purpose of review, **Book Een zelfgekozen indecker** Psychology Science Nonfiction In this perceptive sensitive study Jesse Bering looks at suicide from all angles. **Book Een zelfgekozen einde 2e** He looks at it psychologically from the mental health perspective, **Science Een zelfgekozen index masfak** He examines the sociological and religious factors that impinge on suicide. **Een zelfgekozen einde science museum** He considers the practicalities of suicide--how access to tools that make suicide easier (guns for example) affects suicide rates. **Book Een**

**zelfgekozen eindeks** Then moving beyond these academic analyses Bering probes numerous individual stories of those who have attempted suicide or died by suicide. **Kindle Een zelfgekozen einde** He quotes extensively from and reflects upon their journals and suicide notes and he listens to and relates to his readers what their family members and friends have to say: **Book Een zelfgekozen eindecker plane** To shed further light he interviews mental health professionals who have worked with suicidal individuals and academics who have written and published extensively on suicide, **Een zelfgekozen einde booker** Finally he writes about his own struggles with suicidal ideation; this is a very personal book for Bering and it's all the better for it, **Book Een zelfgekozen einder funeral** The final result is a fascinating extremely informative nuanced discussion of suicide. **Book Een zelfgekozen eindecker** It offers no easy answers or definitive judgements for there are none, **Een zelfgekozen einde kindle** This is a book that is going to stick with me and will I think with most readers: **Book Een zelfgekozen eindelijk** Psychology Science Nonfiction Positives of this book: it provides some interesting statistics/scenarios that shed more light on the topic, **Book Een zelfgekozen einder funeral** What is not relevant however is whether or not there actually is an afterlife: **EBook Een zelfgekozen eindecker** And this author made it clear that 1) he does not believe in an afterlife and 2) if you disagree you're wrong. **EPub Een zelfgekozen eindelijk** Why'd you go and do that bro I was with you up until now. **EBook Een zelfgekozen eindecker plane** At one point he talks about a study carried out with young children being the subjects essentially to test if they believed that the consciousness lives on when the body dies. **Een zelfgekozen einders educatie** To imply that YOU a developmental psychologist have the answer that people have been searching for for centuries, **Book Een zelfgekozen einder funeral** YOU alone are sure that there is no life after death! Gee that's neat, **Een zelfgekozen eindemarkering** Please email me the study in which you categorically proved that the consciousness dies when the body does, **Psychology Een zelfgekozen eindecker plane** I did not read this book for your philosophical opinion sir: **Nonfiction Een zelfgekozen eindelijk** I read it for an informed evaluation of why people might take their own lives and what they might be feeling up until that point: **EPub Een zelfgekozen einder funeral** To bring your faith (or lack thereof) into what is supposed to be a scientific analysis of human behaviour and present it as fact is absurd, **Een zelfgekozen einde pdf24** For anyone wanting to come at me - I'm not annoyed that this guy is not religious. **Psychology Een zelfgekozen eindecker** I don't give a shit what anyone believes as long as it's not hurting other people: **PDF Een zelfgekozen einder funeral** What's pissed me off is that this guy has used his nonfiction science based book which features scientific research and investigation to present his own belief as fact. **Een zelfgekozen einde science museum** Whether or not there is an afterlife does not matter here when you're only supposed to be informing me of whether or not belief in that afterlife affects suicide rates: **Een zelfgekozen einde psychology** Literally why would you even bring your lack of faith into that: **Nonfiction Een zelfgekozen eindelijk** tl;dr: I read this book to learn more about suicidal minds not have you tell me that God isn't real. **Book Een zelfgekozen einde** Unless you have some kind of proof to back that claim up do not state your opinion as fact in a nonfiction book supposed to be based in science: **Een zelfgekozen einde ebook** Psychology Science Nonfiction

She kills herself not out of guilt for her actions but for the shame of others finding out: **EBook Een zelfgekozen einde** Humans are social beings constantly thinking about what others think, **Book**

**Een zelfgekozen einder funeral** Also not everyone who is depressed dies by suicide and not everyone who commits suicide is depressed, **Een zelfgekozen eindemarkering** Damning information and just to add onto that historically suicide has accounted for more deaths than all wars and homicides combined: **Een zelfgekozen einde psychology degree** The book explores the 6 stages a suicidal person goes through before they get to a point of no return, **Book Een zelfgekozen einde 2e** Its almost heart-wrenching to read some of these stories and think to myself hey talk to someone someone must care: **Book Een zelfgekozen einder funeral** I now no longer judge those who decide to go this way my mind has been opened to accept that my and your moral standpoint on this matter doesn't do anyone any favors: **Book Een zelfgekozen eindeks** Why are we the only apes that jump? What can we do to stop ourselves? If you are suicidal I believe this would be a great read considering the author was also suicidal. **Book Een zelfgekozen einder funeral** For those who are not suicidal it will help you view things in a different perspective: **Book Een zelfgekozen eindecker plane** To know what signs to look out for in our friends family etc and what we can do to help: **Book Een zelfgekozen einder** After a lonely Bay Area man killed himself by jumping off the Golden Gate Bridge. **Book Een zelfgekozen eindeks** I am going to walk to the bridge it read If one person smiles to me on the way I will not jump: **Een zelfgekozen eindeutigkeit** Psychology Science Nonfiction I half expected this book to be a frivolous read, **Book Een zelfgekozen einde 2e** I admit bias when the author confesses his literary work with such lurid names as Why Is a Penis Shaped Like That amongst others, **Book Een zelfgekozen eindeutig** But as one of many others who have a history of addiction mental and suicidal thoughts. **Book Een zelfgekozen index masfak** I thought this might come in handy with understanding the profundity of taking one's life. **EPub Een zelfgekozen eindeks** Jesse writes and I agree that aside from morality religious or libertarian we have an immense history of self harm and for loads of fathomable and mysterious reasons, **Science Een zelfgekozen index masfak** Some quick to commit some use it as an attention seeking tool. **Een zelfgekozen einde epub file** Whatever the flavors a person's descent into self non existence is: **EPub Een zelfgekozen index** Nobody close to its action/actor is immune to its affects and effects, **EBook Een zelfgekozen einder funeral** Unless we are in their shoes we will never understand the motivation: **Een zelfgekozen einde psychology degree** Psychology Science Science Nonfiction So if you see me reading a lot of suicide books and something happens to me I was murdered, **Een zelfgekozen eindemarkering** I'm doing some reading because there was a suicide at my work, **Een zelfgekozen eindemarkering** Most books fall into the 'memoir' category and here and there a 'therapy techniques' book, **Book Een zelfgekozen einde 2e** This is the only one I've found that is scientific non-judgemental and the closest thing to answering the 'why's of the people left behind: **PDF Een zelfgekozen eindecker plane** It explains that suicide is more common among people whose lives are going basically well because the focus comes to be on the few things that aren't going well: **Book Een zelfgekozen einder** It explains the process that the brain goes through as it tricks itself into its own end: **Book Een zelfgekozen index** Also there is a bacteria that can cause suicidal ideation in humans and attraction to cat piss in rats. **Een zelfgekozen einder communicatie** Since it's written by someone with suicidal tendencies it has a unique perspective and you can tell that he really empathizes with some of the people who took their lives, **Science Een zelfgekozen index masfak** Part historical overview part psychological profile and part biology this is the best book on suicide I have encountered: **Science Een zelfgekozen index masfak** Psychology Science Nonfiction Bering interweaves his own experience with suicidal ideation with historical research on suicide in search of describing the suicidal mind. **Een zelfgekozen einder** His big contention is that the book will explore the suicidal person in all of us, **Book Een zelfgekozen einder funeral** Clearly the book resonated with me as in the back matter of the book I listed two full pages of tiny scribbled notes and quotations. **Een zelfgekozen einde science museum** In part my interest comes from my own intense year in 2014 of suicidal ideation, **Een zelfgekozen einde ebooks free** I was never suicidal which I hate writing as if to say at least I wasn't suicidal like: **PDF Een zelfgekozen eindeks** It just wasn't in my DNA or possibly it was simply the luck of combining my genetic proclivities with my

environment at the time. **Kindle Een zelfgekozen index masfak** Of course no guarantees those feelings will not return and the experience will always be there even if deeply tucked away. **Een zelfgekozen einde booklet** In short I wrote and ruminated on what life means and what kind of life is worth living; that's the academic version. **Book Een zelfgekozen eindelijk** But I also was wracked with the pain and extreme ludicrous nature of this life we live, **Book Een zelfgekozen einder funeral** I was counting down the years until 60 until retirement until. **Een zelfgekozen einde booker** I'm also interested because I agree in spirit with Camus' contention that suicide is the only truly serious philosophical problem. **Een zelfgekozen einde science museum** What bigger question is there? But even as I write this I realize many probably most will disagree. **Een zelfgekozen einderstraat** When you are happy you know that it will dissipate but it feels like it could last forever, **Book Een zelfgekozen eindecker** A protracted and dull lethargy that is dense but in the moment it feels like it could last forever (127); **Een zelfgekozen einde pdf** It is a pity that the scales of justice tilt so heavily in our minds in favor of a person's worst deed (229). His first book *The Belief Instinct* (W. W. His first book *The Belief Instinct* (W. W. The statistics and studies are fascinating. The risks stack rather than run concurrently. The why remains a mystery. 3 stars.com/post/bookblog20." In the book cyberbullying was covered briefly. The journal entries were indeed "extraordinary". Fuji. He asks the philosophical and ethical questions surrounding it. It is humane thoughtful wise and kind. The writing is accessible. My biggest gripe: he went and brought religion into it. Here's my deal - religion IS relevant here.'The word erroneous here carries so much weight. I mean the arrogance. Before you ask yes I am religious. However I also love science. Frankly I think it's just incompetent. But more than anything it was irrelevant. It came across as arrogant and gross. What we ourselves think. And what others think we think. The natural psychologists of the animal kingdom. I mean that shows he's empathetic enough. a suicide note had been left on a bureau. History and philosophical persuasion aside. It's not a mind disease. It's not a survival or adaptive behaviour. It's a social affliction that persists. It wasn't suicide. Yet I don't see it that way. And that's most likely a good thing. Thank goodness. Yet for me much resonates. When you are sad it is long. I am not sad so much as gone (134). Psychology Science Nonfiction.
