

New Avengers: A.I.M., Vol. 1: Everything is New By Al Ewing **Book New avengers: infinity** Paperback Al Ewing tanks another Marvel title with New Avengers! I don't read everything but I do read a fair amount of Marvel's output and I don't remember when Advanced Idea Mechanics (AIM - the beekeeper villains) suddenly became the good guys but that's what they are in New Avengers... for reasons I assume?! I guess Everything Is New like the subtitle says (an upbeat reversal of Jonathan Hickman's first New Avengers book Everything Dies probably signalling renewal after Secret Wars - fart). **New avengers vol 4** Fucking ANYONE can be an Avenger if a girl who looks like a squirrel and has a pet squirrel can be asked to defend the planet! If you're conscious and can hold a knife then you're already more capable than she is. **New avengers vol 1** Ewing does no character work on any of them so if you don't know who they are tough titties! Songbird Power Man and White Tiger are written as generic male/female toughs while Squirrel Girl is the "hilarious" quip-y one. **New avengers spider man** I already knew Hawkeye from his solo series and Wiccan and Hulking from Kieron Gillen/Jamie McKelvie's Young Avengers but I can see newcomers wondering who they are - hell new readers are gonna be lost full stop! Everyone in this book comes off as utterly one-dimensional. **New avengers spider man** The Maker (evil Reed Richards with a funny hat) has survived Battleworld and wants to give the French diamonds for heads... yeah the guy's a genius... and then Hulking gets a magic sword and has to fight Wiccan who's been taken over by a Cthulu monster. **New avengers everything dies** Oh and please let's have some time-travel horseshit because Marvel don't do enough of that already! They're like disposable Saturday morning cartoon storylines that are just thrown together without any thought - directionless unfocused and instantly forgettable gibberish. **New avengers sleeper** I bet his biggest artistic influence was Rob Liefeld... And that's Al Ewwwwwing's New Avengers: Everything Is Garbage! Paperback When I think back to the greatness of Bendis' The New Avengers Volume 1: Breakout and come to see his legacy ruined while he's still at Marvel I just can't! AIM Roberto Dacosta and the team Wiccan White Tiger Pod Powerman Songbird Hulking Squirrel Girl. **New avengers transformers** Sunspot has bought out AIM the old villainous science terrorist group Advanced Ideas Mechanics and repurposed it to become an Avengers offshoot focusing on scientific research called Avengers Ideas Mechanics. **Avengers new years countdown** M (who are good guys now?) are a bunch of somewhat known heroes I vaguely remember most of them and the writers actually must know this because they splatter info bubbles reminding you who is who. **New avengers vol 1** Where Agent of Asgard was a sequel of sorts to Kieron Gillen's Journey Into Mystery and Young Avengers focusing on Loki New Avengers Volume 1 is a sequel of sorts to Young Avengers focusing on Billy Kaplan and Teddy Altman or Wiccan and Hulking respectively. **New avengers illuminati** So some guy named Bobby DaCosta (never heard of him) is apparently very rich and is now the head of AIM the scienc-y terrorist organisation which is basically Hydra if I remember correctly. **New avengers kindle unlimited** At first the main threat seems to be people getting crystal-headed (yep) all over the world and the main villain seems to be The Maker that boring asshole Reed Richards from the Ultimate universe who somehow is still around after Secret Wars. **Book New avengers: infinity** Then there is some green Cthulhu-type tentacle monster that is doing evil stuff for a couple of issues before possessing the body of Billy turning him into Demiurge yet another villain. **New avengers enemy** The team consists of Billy and Hulking Clint Barton Hawkeye Squirrel Girl and Tippy-Toe White Tiger Sunspot (this DaCosta dude) Pod Powerman and Songbird if I'm not forgetting anybody. **New avengers mcu** There were a couple of pages in the last issue drawn by Phil Noto which felt like a breath of fresh air before falling back into the stinking pit of Gerardo Sandoval's drawings. **New avengers siege** Billy is suddenly bulky and looks like he stole a Vincent Valentine costume the women all have wasp waists and balloon boobs (though thankfully it's low on cheesecake poses) and Victor Alvarez almost looks like David Alleyne. **New avengers steed** The story partly focuses on Billy and Teddy which I simply couldn't be happier about but the each member of the ensemble gets at least a few good character moments over the course of the book:

New avengers after endgame

And then you bring in the villain from Ultimates universe later on, **Book New avengers: infinity** I do like a lot of the Young Avengers and other characters in here, **New avengers bookpedia** I also thought having evil reed richards would have been a perfect villain but, **New avengers book** The sinister evil version we got from Hickman is not here, **New avengersq quiz** Also the plot is just jumbling and confusing and honestly boring, **New avengers after endgame** The art also is trying to be a hybrid of western and eastern art but doesn't nail either very well, **New marvel comics** This wasn't a terrible book but boring would probably define it best, **New avengers streaming** and that transition so perhaps I'll have to swing back around to read that but otherwise it's an introduction to the New Avengers. **Next marvel avengers book** New Avengers is a fitting name because they compiled quite the new team with a single experienced Avenger in Hawkeye, **Kindle New avengers cast** I've heard of all the members of the team except for Songbird, **New avengers annual** These are C level at best heroes who I imagine a casual reader doesn't know exist. **PDF New avengers endgame** The storyline was pretty straightforward except for one surprise a certain character who appeared to die during Secret Wars is still alive. **New avengers complex** I won't spoil it but it's quite the surprise which I envision will lead to some pleasant story complications in the future. **New avengers echo** Everything is New was just fine but now I wonder if it can be more than that, **New avengers cast** And while I'm not a huge Hickman fan what I read of his New Avengers was surprisingly decent - his team made sense and their goals were clear, **New avengers vol 3** I have no idea how this arbitrary assortment of characters came together or why. **New avengers omnibus** The New Avengers in this series are: Songbird Wiccan Hulkling Power Man White Tiger Squirrel Girl and Clint Barton Hawkeye led by Sunspot (who's also now head of AIM). **New avengers age of ultron** Patton Oswalt had a great bit about the Avengers and how Cap hangs around sporting goods stores recruiting the customers, **Kindle New avengers cast** "I like the way you tetherball sir how would you like to fight ULTRON?" - that's basically how I feel about Squirrel Girl: **New avengers comics** Hoho Hawkeye's a SHIELD spy and he's spilled the beans to everyone - that plot point goes nowhere: **Avengers new years countdown** Gerardo Sandoval's art is slightly better than it was in the horrendous Secret Wars Age of Apocalypse tie-in but it's still ghastly - way too busy flat and ugly, **Pdf new avengers download** The dude has no idea how to draw anatomy - everyone looks weirdly distorted especially their hands. **New avengers reading order** 2017 read Paperback Is Squirrel Girl's power to be super annoying? Even her buck teeth are cringeworthy, **EPub New avengers secret** The only thing that saved this book was time travel story at the end and that was mediocre too: **New avengers kindle free** Paperback Al Ewing is fast becoming one of my favourite comicbook writers, **New avengers book** The group also has a field team lead by Songbird which has a line-up I absolutely LOVE. **New avengersq qa** This first arc has them going up against the evil alternate reality version of Reed Richards from the now-defunct Ultimate universe and a Lovecraftian horror called Moridun: **EPub New avengers secret** I loved that it tied up some loose ends from the now-defunct (I like the word defunct) Young Avengers book. **Avengers new book** I can even forgive it for flogging the time travel dead horse. **PDF New avengers endgame** So why only three stars? Well it's like this; I just can't stand Gerardo Sandoval's artwork, **EPub New avengers game** I get that it's action-packed and very kinetic but I just can't get past his complete disregard for anatomy and perspective, **New avengers breakout** His is a very graffiti-like style and it's very mid-'90s Image. **New avengers transformers** The sections of this book illustrated by fill-in artists were like breaths of fresh air, **New avengers transformers** In the wake of Secret Wars the old order changeth - and Bobby DaCosta Sunspot is just the man to changeth it. **PDF New avengers endgame** Welcome to Avengers Idea Mechanics -- a super-scientific global rescue squad of tomorrow's heroes: **New avengers mcu** doesn't know what to do with them! But Earth might not survive without them! Collecting: New Avengers 1-6 material from Avengers 0 New Avengers: A, **New avengersq quiz** 1: Everything is New

It had a few cool moments but mainly a bunch of meh. **New avengers spider man** First off the book has a really really rough start its a horrible intro, **New avengers breakout** R and they turn most of Paris into crystal headed bad dudes. **New Avengers kindle direct** Once thats over the bigger bad guy is brought in who takes over Wiccan. **New avengers read online** I can happily say I will pass on the series I dont care much for this team: **New avengersx xbox** Paperback I'm starting to think Al Ewing isn't my style of writing. **New avengers book** Then poof it didn't sell enough and we had to get rid of it: **New avengers reading order** New Avengers is throwing together the Avengers no one really remembers or loves: **Avengers of the new world pdf** Some are young avengers some are actual avengers it could have been great: **New avengers game characters** Paperback So after finishing Ewing's brilliant Loki series I decided to give his current Marvel titles a try, **New avengers annual** And where Loki was a huge success New Avengers is as huge a failure: **New young avengers** First of all the setup is kind of ridiculous and is left completely unexplained. **New avengers mcu** Except that now it's not now it's a base for the New Avengers team, **Next avengers comics** By the way jeez how many of those are there? Why does every Marvel team now has to be named either the-something-X-Men or the-something-Avengers?The plot is all over the place: **New avengers vol 2** Only he doesn't do crap in this volume except talk a lot: **New avengers vol 2** Anyway that plot thread turns out to be largely inconsequential and is quickly forgotten: **New avengers read online** And then for some reason a team of generic future Avengers called Avengers of 20xx (they literally call themselves that) go back in time (ugh) to save everyone from evil Billy. **New avengersx xbox** Honestly reading this book was just as boring as reciting the events here. **New avengers echo** And I know it's only been one volume but man it seems that 80% of the characters are purely decorative: **Kindle new avengers pdf** I mean only half of them are even present on the cover. **New avengers breakout** And the story only focused on Billy And Teddy for the most part plus a bit of DaCosta: **New avengersx xbox** All the dudes look way too buff (Hawkeye ugh!) all the women have huge breasts and the faces are universally ugly, **EPub New avengers secret 1**: Everything is New (what a title) is an entirely skippable book that doesn't even look nice: **New avengers book 2022** A huge disappointment considering how much I loved Ewing's previous work. **New avengers vol 1** I will give his second current title — The Ultimates — a read when the first arc is complete but based on this volume I am underwhelmed, **EPub New avengers: infinity** In case of New Avengers though I definitely will not continue reading this series: **New avengers vol 2** Paperback I already knew I liked Ewing and was curious what he'd do with YA team members: **New avengers omnibus** The first couple issues were weird but the story evened out to a solid finish: **New avengers vol 2** Good humor Billy and Teddy are adorable has some moving moments on Billy's depression: **Avengers new years countdown** Even though the new AIM and current team lineup is odd I'm willing to roll with it: **Ebook new avengers free download** While the bright colors and energy are good the sketchy lines and exaggerated proportions don't work well with the story and mostly make for a confusing muddle: **Avengers new book** It's not without good moments but overall I find it a bad fit. **New avengers eagles nest** I much preferred the bits toward the end where another artist stepped in for some of the Billy/Cthulu confrontation, **Kindle New avengers cast** I'm very sad about this as I like many of the characters and Ewing. **New avengers book** I'm not sure if I'll continue despite warming up to the story: **Avengers new years countdown** The cast is full of

characters I love: Squirrel Girl Hulkling Wiccan Hawkeye (version Clint). **New Avengers kindle direct** I really like the rest of the team and the idea is kind of fun: AIM has been bought out and turned into an Avengers adjunct, **Avengers new book** There's all these multi-billionaire heroes in the Marvel universe and it was about time one of them actually threw his money at a problem to solve it. **New Avengers kindle direct** And while it's not really surprising that The Maker survived Secret Wars I am interested to see where they're heading with him. **New avengers illuminati** It could be good and it could be terrible I'm really not sure yet. Evil Reed Richards. Sounds like a homerun right? Nope. Good: Some of the banter is funny. Bad: Evil reed richards comes across dumb here. Too bad.

New avengers vol 1

Roberto da Costa aka Sunspot bought A.I.M. altering their moniker to Avengers Idea Mechanics. From Avengers Island the new A.I.M. sends out the New Avengers to help defend the world. Everything is New was an OK introductory story. I missed Sunspot buying A.I.M. Time will tell. Squirrel Girl... I'm starting to hate this character. The stories stink. why? Moderate stuff ensues. 4 out of 12. I love the concept of his New Avengers. I loved this story. I absolutely ADORED the ending. and it's just not for me I'm afraid. Paperback Everything Is New. today! America doesn't want them! S.H.I.E.L.D.I.M. Vol. The new avengers A.I. Once the book gets going its just OK. The story revolves around W.H.I.S.P.E. So Ultimates was once a universe. A 1.5 out of 5. All the plots are resolved as quickly as they start. The cast is huge but mostly useless. Now it is a huge cast for a team book. The worst thing for me though was the artwork. New Avengers: A.I.M. Vol. But the art really really didn't work for me. At all. I hope they switch to a different artist. Paperback This just worked for me on nearly every level. But as a first volume this made me very happy indeed. Paperback.
