

The Liquid Man By C.B. Gilford Horribly boring stay away! The Liquid Man The world around Graxton was a world of woods and lakes brooding mountains and quiet valleys; a country apart from the great urban centers the bustling pace of metropolitan life that seemed to rule so much of modern society: While the book is well-written it is dated (1969) which didn't help me to take it seriously, Guilford wrote a lot of quirky stuff for TV back in the day and this book would've worked well for a 60 minute Twilight Zone episode: Never felt like sci-fi just weird but worth a read if you like this kind of novel. It drags toward the end; took me awhile to finish because I became bored: Brilliant young scientist experiments on himself with disastrous results, People and events were little changed over the last century until Paul Vandrak came home. Vandrak had walked out on a promising career as a government scientist carrying a secret so terrible that it meant death to those he loved most. He had come home to die and it looked like his beautiful home town would die with him[1]

Starts better than it ends. Started feeling a little silly about halfway through. The set up was somewhat fascinating. C.B. A little too long in book form. The Liquid Man Extremely dull SF thriller. Add annoying curious brat and dumb romantic interest. Time stood still in Graxton. The Liquid Man
