

Safe Haven Wolves Box Set 1: Books 1-3, Gabby, Trina, Kate (Safe Haven Wolves Boxed Sets) By Sherry Foster **Safe Haven Wolves Box Set 1ws login** Will Jaden cross the wrong people in his journey to get his mate? Can Trina stay free long enough to find Gabby? Will their journeys bring them together or destroy any chance of them finding each other? **KATE** They call her a guest. **Safe Haven Wolves Box Set 1z111** Highly recommend for people who enjoy these type of stories 397 In theory this storyline is great But the author has way too much confusing back story and point of view changes I can't deal with it. **Kindle Safe Haven Wolves Box Set 1964** I thought this was going to be way more interesting than what I could get through but there's too much going on and not enough explaining or things happening to explain stuff like with Donny and the conversations that Gammon and Trey have without dialogue that I'm getting irritated.

Although I really like how the story is done the plot is very good and the premise of the wolf packs trying to preserve and protect their females is well done there are language errors in the writing that can be off putting:
