I live in one of the most beautiful places in Florida Jupiter with my wife two kids and our golden retriever Vincent. Ive been a full time author for the last 15 years and I wouldnt trade it against anything in the world!My father was a journalist and wrote about some of the worst crimes you could ever imagine and thats where my big interest from serial killers and other horrible crimes comes from. I've been a full time author for the last 15 years and I wouldn't trade it against anything in the world!My father was a journalist and wrote about some of the worst crimes you could ever imagine and that's where my big interest from serial killers and other horrible crimes comes from. You will be disturbed but at the same time you won't be able to stop reading! Killer Moms: 16 Bizarre True Crime Stories of Murderous MomsGirls gone wild !! These are some crazy moms and one right from my neighborhood . Some of the stories were ok but I am very unimpressed for three main reasons:1) I know that it is all trial by social media now but this book is based on the law and trials. Just as those who do not like the death sentence say it is better not to have it than one innocent person should be executed so it is better that people not convicted of crimes are not libelled in case just one person has their reputation and life ruined. So? Why is this some kind of sin until you are married? That belongs in the past with homophobia racism and all the things we've learned a progressive and equal society should expunge. There is a crazy but very enjoyable book Go Ask Alice with the same attitude as the author once you take a puff once you have a glass of wine once you have sex the path downhill is inexorable. Not necessarily because it's all that enjoyable in any way shape or form to delve a little too deeply into the malefic minds of such murderous individuals but because I sincerely believe that most people are fascinated in one way or another by true-life crime. True crime novels are often so immersive that it can psychologically drain me to go through just one case so when I saw this one had 16 I was worried I'd be in for a ride. The actual meat of the crime was always described with respect to those involved didn't focus too much on the gory parts of said crimes (which I see a lot in true crime media) and wasn't dragged out over multiple pages for no reason. There were a few cases in this book that I was familiar with through the national coverage the trials received but there was still information included in the book that was new to me. Rosewood didn't waste the reader's time exploring points of speculation or sensationalized details in an effort to keep you reading nor did he fly off the handle with claims based off of unsubstantiated rumors in place of actual information. He provides a condensed but detailed and objective look into each case and gives a brief psychological look into each woman's mentality motives and intentions leading up to and following their crimes. There was a case in the book that I wasn't familiar with so I wasn't sure of the exact spelling of one of the suspect's names but the spelling of said name flip-flopped repeatedly through the story and that kind of threw me off. If you are new to true crime prefer a more condensed investigation into the genre or want a change in the presentation and overall feel of your true crime narration check out Killer Moms. Thank you to

the author for allowing me to review a copy! Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms If there were an option for zero stars this would be the book. Whether or not the public believes she murdered her daughter (and she may have) she was not convicted of murder thus every time the author calls her a murderer he is creating a libel suit. Trying to wade through the information in each 'chapter' is useless because most of the information is author conjecture author bias and just plain ramblings that really offer no insight into the cases themselves. I generally prefer true crime that has footnotes (you know source material that helps to 'prove' something rather than just word vomit) but I am more than willing to read through these little mini-reads. Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms The deranged female murderers/&/or killers/serial that interested me the most are: Chapter 2 The Made for TV Murderess A Wild Child Casey Marie Anthony; Chapter 3 Kelly Grant and the Make a Wish Murder Kelly Renee Grant; Chapter 4 Serial Killing Her Kids Megan Huntsman; Chapter 5 The Cold as Ice Mom Michelle Blair; Chapter 6 The Female "Fugitive" Diane Downs Diane Frederickson; Chapter 10 Andrea Yates; Chapter 12 A "Carjacker" Did It Susan Smith Susan Lee Vaughn; Chapter 14 The Devil Made Her Do It Isabel Martinez; Chapter 15 Killing for the Apocalypse Dena Schlosser I do not receive any type of compensation for reading & reviewing free books from publishers & authors. Warning: This book contains descriptive accounts of extremely graphic adult content violence or expletive language &/or uncensored sexually explicit material (Lesbian Gay Bisexual Transgender Queer Intersex Asexual Pansexual Metrosexual (LGBTQIAPM) virgin transvestite incest pedophile rape sodomy minor/adult verbally psychologically emotionally physically & sexual abuse pornography kidnapping/prostitution of a human trafficking (slavery) for sexual exploitation BDSM) which is only suitable for mature readers. This could also make another great true crime movie PP presentation or better yet a paid-per-view mini TV series or even a documentary (Crime Museum; True Crime; American Crime Story; Investigative Discovery). Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms You might find it hard that voracious reviewer of nonfiction Christian books would ever consider not only reading but reviewing a book like this. While about 68% of the 97 books I've reviewed so far this year have belonged to this genre being a TOP CONTRIBUTOR on Amazon for True Crime books I'm enthralled by what would drive an individual to commit such heinous crimes. Perhaps this hasn't been in His plans for us to have any children which might be for the better since one of us suffers from a genetic condition we didn't want to pass on to any children we might have had. While it is medically understandable that some women might suffer from the condition known as postpartum psychosis after giving birth causing them to react with an unknowing behavior of what they're doing. This insightful book of the unimaginable thought of mothers capable of murdering their children has been well-written by the book's author giving his readers knowledge of what some mothers are capable of doing when confronted by certain unexpected situations. Given the above I've given the author Jack Rosewood 5 STARS for his endeavor here and I pray these women will attempt to ask forgiveness from the Lord for their intolerable transgressions provided they're willing to do so. One of the cases features a woman who killed her kids in front of her husband . It's disturbing and none of us like to think about innocent lives being taken by the very people who should love and care for them. These are all well-written stories showcasing the motives behind the killings. He handles the crimes better than most with more attention paid to the WHY than to gruesome details. Many thanks to the author for this digital copy of True Crime Stories: Read and reviewed voluntarily.

Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms will surely raise more than a few hairs on the back of your neck: It was a good read and the author gave a perspective to these horrific crimes that was both fascinating and riveting, This was one of the better true crime books that I have read recently, I would highly recommend this read to all fans of the true crime genre. I'm also a big fan of Jack Rosewood so it's another 5 Stars from me, Just to hear my father talk about the evil acts of Ted Bundy as we were out fishing as a kid are some of my best memories: I live in one of the most beautiful places in Florida Jupiter with my wife two kids and our golden retriever Vincent: Just to hear my father talk about the evil acts of Ted Bundy as we were out fishing as a kid are some

of my best memories. {site_link} We all love our mothers right? Our moms fed us tucked us into our beds at night and nursed all of our bruises both physical and emotional when we were kids: For most of us we have our mothers to thank for the men and women we are today, In this book you'll learn about sixteen of the most terrible cases of moms who killed their own children: None of these women will get a Mother of the Year award and very few will get Mother's Day cards while they sit in prison but their cases are sure to intrigue you, You'll learn about little known details of some high-profile killer mom cases such as Casey Anthony and Andrea Yates and a few that are little known. You'll read about moms who killed their children for profit and others who did so because they were tired of them. There are also a few cases profiled in this book that just defy explanation and appear to have been driven by no motive other than insanity. So sit back relax and open the pages of this book to learn about sixteen of the most dastardly mothers in American history: *LOL Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms* I did not really enjoy this book: Whatever you think of Casey Anthony she was found not guilty of her daughter's murder. It is libelling her to include her in a book of Murderous Moms, A man in the UK was recently killed after he was labelled a paedophile which he wasn't. 2) The attitude of the author is that these women when young all experimented with drugs alcohol and sex, This is so much part of the judgement of she's a slut if she has sex but he's a stud: is marijuana wrong? Depends where you live doesn't it? It's a crime and a sin in this place and a legal high and medicine in another. Alcohol? Most of us 'experimented' with alcohol in our teens: Some of us (me) didn't like it at all I preferred weed I hated the taste of alcohol others enjoyed a drink with their friends. But I know what he's getting at he's a Nancy Reaganite - Just Say No although according to Kitty Kelley she didn't practice what she preached, To Beatrice Sparks that meant the girl would end up dead to the author it means she will end up causing death she will be a Murderous Mom: 3) The book is a rehash of stories easily found on the internet: So far the promised revelations that couldn't be found in the news haven't materialised. It's competently written but 'competent' is just one step one from damning with faint praise. But as Monty Python says Always look on the bri-i-i-ght side of life - dnf'ing it meant more time for Good Books: *Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms* Mothers are the nurturers . The mothers in this book will never make Mother of the Year, There are several chapters devoted to those well-known moms we've seen in the news or on Court TV within the last 10 years or so, Then there's the one woman who killed every time she had a baby, Separated from her husband opinions expressed here are unbiased and entirely my own: *Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms* Novice workEach chapter was filled with grammatical and historical errors the editing of this book is atrocious, I felt like I was reading passages written by my teenage son: *Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms* 16 Bizarre True Crime Stories of Murderous Moms, Bestselling author Jack Rosewood does not disappoint with this book with all of the shock and horrifying details in it, This really was one of those hard to put down books and I thoroughly enjoyed reading it: The entire time I was reading this book I had a constant feeling of disbelief: It's an insightful and graphically detailed account of some of the most horrific real-life crimes, In fact while reading yet another of Jack Rosewoods books I just had to keep turning the pages yet again. However maybe it just astounds the average person as to how depraved another individual can be: This book is even more astounding as it deals with women who murder their own children. The book delves deeply into 16 bizarre true crime stories of murderous mothers, Even if you are a seasoned campaigner of true crime although I usually prefer shows or movies as the books can sometimes be a bit much for me. lol Thankfully *Killer Moms* was able to deftly navigate discussing 16 objectively awful people committing absolutely heinous disgusting crimes without the psych hangover afterward: While some of the names were familiar to me I wasn't familiar with a lot of the details surrounding the investigations and the book laid them out pretty simply. I also liked the tone of the book; it didn't follow the mold of typical true crime narration which is usually very monotone and serious, I enjoyed the copious amounts of shade I picked up when reading through the excuses or backgrounds of the women who committed these crimes. The tone of the book wasn't light-hearted overall which I liked because that could have severely undercut the seriousness of the subject

matter: However it wasn't so serious that I couldn't pick up the author's snark and general disbelief (which I shared) at some of the things that were said and done by these women, Rosewood has done his research on each of these women and it shows: Some of those were mentioned here and there but they were always presented accurately for what they were: On a smaller note I also liked the time jump between cases, Some were more recent others were decades ago some were nationally covered and others were not. For the ones that weren't they were so bizarre I found myself wondering why the media looked past them. If you like true crime but find most true crime media difficult to get through this is a wonderful alternative that is no less accurate or thorough, As another reviewer mentioned the author's style is very readable: He does so in a manner that in no way excuses them but certainly goes a long way to explaining how they ended up in the situations that they did, They all still suck but I did enjoy learning about their backgrounds and how each woman was shaped by theirs. If I had any critiques I'd say to run the final draft through a proofreader one more time: I noticed other small similar errors which were usually with names or missing letters but nothing a quick proofread wouldn't fix: Where do I even begin?The writing is atrocious and that is being kind in some areas. It is very clear to me that there was no editor here or at the very least not an editor that cared to actually read some of this drivel. As an educator I realize that writing is sometimes not a student's strong suit, In some cases the ideas are there but the writing does not live up to expectations, Unfortunately when it comes to this book the ideas are not even thought out fully or developed in a way that would be useful to readers. Honestly there are newspaper articles available online that are more informative and better written than this entire book. In fact after a brief search of some of these cases on Google I found a plethora of other source material, [Actual factual source material not just an author mumbling and musing] The author (and I suspect the editors and publisher) is also unaware of the definition of libel. He includes a very famous case Casey Anthony and continues to call Anthony a murderer: There is an additional case within the book that has not gone to trial at the time of publication. whether or not you believe this woman killed her children (again she may have) she has not been convicted thus libel, I cannot believe the publisher was not a little more careful about this: Leads me to believe that the editors and publishers are both somewhat non-existent and this may be a passion project. Set aside the terrible writing and the libel for a moment: Every story is pretty much: there is a woman she has issues she's a mother she kills her child(ren). Don't waste your time on this one if you want anything of depth. Therefore I am under no obligation to write a positive review only an honest one, It may be offensive or have potential adverse psychological effects on the reader, If you are especially sensitive to this type of material it is strongly advised not to read any further: It was quite easy for me to read/follow from start/finish & never a dull moment: There were no grammar/typo errors nor any repetitive or out of line sequence sentences, Lots of exciting scenarios with several twists/turns & a great description list of unique characters settings facts etc, There are no references works cited or endnotes so I will only rate it at 3/5 stars. Thank you for the free author; LAK Publishing; Amazon Digital Services LLC, ; book Tony Parsons MSW (Washburn) Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms I won this book from LibraryThing Member Giveaways. Suspense/thriller and true crime my two favorite genres are closely related. The only difference is one is fiction a story dreamed up in the mind of a creative author. The other is factual an atrocity committed by a disturbed person. Then is divided into sixteen chapters(cases) all centered on a common theme killer moms, Granted some of the cases were relatively more publicized and sensationalized than others but that does not mean the obscure ones were any less significant. Rosewood's writing style is very readable with its simple accessible language and short sentences: Of course I had heard of Casey Anthony Andrea Yates and Susan Smith because they were all over the news(and social media), I recognized their names and knew what they were charged with. And thereby violating the commandment of THOU SHALL NOT KILL which is why I found this to be especially true with the 16 individuals this book discusses. Albeit my dear OH and I haven't gotten endowed with the birth of any children, So not having any children of our own I find it inconceivable that any woman would even consider brutally murdering the child they've gotten blessed with:

Rosewood has done in this book has been to dwell on other causes that can be considered indefensible: The cases he has decided to include in his book are design to intrigue his readers as it definitely did for this aficionado of nonfiction Christian books: Killer Moms: 16 Bizarre True Crime Stories of Murderous Moms.

He swore he never knew. 8 babies were found in cardboard boxes in her garage . she left them behind when she moved. Some women kill for financial gain . some kill because they want a freer life. stating I'll kill everyone and everything you love. Yes. women scorned can be dangerous. This book is not for everyone. The author is well known for his true crime. But not all mothers are so great. In fact some moms are just downright nasty and evil. Drugs? He means marijuana. Kitty Kelley was never sued for the content of the book. Only for citing Frank Sinatra's lawyer as a source. The lawyer did not deny the content was true. I read 9 of the stories before dnf'ing it. 3 were ok 6 were not quite that. at least they are suppose to be. Casey Anthony Susan Smith Andrea Yates. Good intel poorly written editing even worse. As a true crime fan I was disappointed. Perhaps it's the human morbid fascination with death. I'm not exactly sure. Mr. Mr. Otherwise I thoroughly enjoyed the book. So. Yet these are useless. Nothing deeper. Nothing useful. An awesome book cover great font & writing style. A very professionally written true crime book. to keep track of. The book opens with an introduction. And closes with a conclusion. All were heinous. All were tragic. Each case history begins with a lead-in. The cases themselves read like fiction. Compelling fiction. In-depth. With graphic descriptions of settings characters and scenes. I finished this in two days! Fast for me. Considering the subject matter enjoy seems inappropriate. It was. unputdownable. Nothing more. This book filled me in on the backstories. I look forward to reading more of his work. What Mr
