

Moon Guardian (Crescent Five, #1) By J.R. Thorn Also not exactly related to this book but I wish this author would finish series before starting new ones! The series that comes before this one isn't even finished this one isn't finished and she's already started at least one new series that comes after this one all set in the same world. But I don't feel compelled to read any more of her books because I'm not sure how I'm supposed to read the series in order if they aren't even finished yet! Paranormal Romance Quand on se retrouve à être la femelle de tout les alphas ça ne peut pas être bon. Katlyn est une jeune femme qui se retrouve en plein territoire des loups avec son meilleur ami Charlie à rechercher de fleurs de Lune pour protéger leur village humain de la magie. Mais ce soir là est différent des autres en effet il s'agit de la soirée où la Déesse de la Lune permet au loup de pouvoir se transformer et ainsi recevoir sa bénédiction pour s'accoupler. Katlyn est une jeune femme qui voue une haine viscérale aux loups et malgré le fait qu'elle soit entourée d'eux et bien elle n'hésite pas à mettre son caractère fort en avant. En tout cas la plume est fluide et se lit très bien les personnages ne sont pas beaucoup travaillés mais le monde où se déroule l'intrigue m'a l'air d'être riche en créatures. Paranormal Romance 75% in and we are still in the same scene of the leading lady running away from the alphas... slow AF pass Paranormal Romance So I'll be the first to admit that I am a huge sucker for Jen's books! I just finished her newest release Moon Guardian and oh how I loved every second of it! It's different from all the shifter books I've read and it's a welcomed difference!! This story follows the human Katlyn who is dead set on keeping her family safe so she ventured into the wolf lands to find the sacred blooms that can save her village from the storms. She must run and she must hide Can she unite the 5? Can she save her family? Will she survive? Please tell me because I'm dying to know!! Congratulations Jen! Another chair gripping story! Can't wait for book 2!! ☐☐ Paranormal Romance Moon Guardian by J. During the wolf shifters scared High Moon Katlyn and her friend Charlie were on an outing in an restricted wolf area looking for moon flowers which keeps humans safe during the High Moon. Humans also aren't supposed to interrupt sacred mating ceremonies but I had a good reason all right? I needed magic and I needed a lot of it to save my little sister from the Moon Shadow plague running rampant in human territory. * Five Fated Mates with No Choosing Required* Slow-Burn Romance* Rejected Mate/Second Change tropes with severe groveling by book 3* Human Female and Wolf Shifter Males Moon Guardian (Crescent Five #1) USA Today Bestselling Author J. ☐☐ Loved this intro to the series! One woman against HOW many alpha male wolves? Frankly I pity the wolves ☐. I am greatly looking forward to our main character making them realize the error of their ways in future books: I was immediately taken by this fascinating world the author drew us into. The strong resilient fearless female character tugs on our heartstrings as we are beautifully introduced to her on these pages: there's a doozy of a cliffy at the end but I've no doubt there's one heck of an adventure continuing in the next book: I don't mean in the I want to read more and am sad to have to leave this world because the book is over sense either. The Alphas are barely

described; after reading book 2 I *think* I can tell you all their names but I can't tell you anything about them except that Kane has silver hair? Grey? The four who rejected her are basically just assholes with no redeeming qualities and nothing to really tell them apart. So even though we got a few different POVs it didn't matter because there was nothing to really differentiate between them except that one of them regretted the decision first. blonde? I don't know anything about her past except that she lost one sister we saw her lose a friend on page and another sister is dying. There's no real world-building beyond random storms destroy human things flowers that grow in moonlight help: Somehow the storms have something to do with the wolves or at least the humans think they do but there's no explanation as to how or why, The wolves were attacked and all the packs have new alphas but we don't know who attacked or why, There's a bunch of dead wolves in the city when she sneaks in but again don't know why or who killed them: What's disappointing is that this story could have worked; the premise is interesting if not original and the world could have been great if it had been explored. Mais alors qu'ils commençaient à jouer gentiment au jeu de Chasse l'odeur de Katlyn se retrouve aux portes des narines de Dash qui est un alpha redouté ainsi que ses pairs. Bien entendu rien ne va se passer comme prévu et Kathlyn va devoir fuir à travers le territoire aride des loups et compagnie d'une aide inattendue: Mais les loups ne l'entendent pas de cette oreille il s'agit de leur femelle, à tous! Dans l'ensemble je dirai que j'ai passé un bon moment de lecture malgré le fait que ce roman soit très rapide à lire: Ici nous sommes dans un roman qui parle de harem inversé mais nous n'avons pas non plus de scènes de sexe à foison. Le seul souci est que leur accouplement est au centre de toutes les attentions et je dois dire qu'au bout d'un moment cela m'a gonflé un peu: La tension sexuelle est tout de même à son comble et quand elle atteint son paroxysme je dois dire que l'auteure sais y faire avec les scènes hot: On peut pas dire que je me sois attachée aux personnages l'intrigue est tellement intense que je n'en ai pas eu le temps, C'est ce côté-ci qui m'a gênée car dès le début nous savons que les alpha sont en rut et ne pensent qu'à ça. L'intitulé ne prends pas le temps d'être posée on est directement larguée dedans, Par contre j'ai beaucoup aimé l'intrigue autour des maladies chez les humains à cause de la magie ainsi que l'apparition d'un autre clan. J'ai hâte de voir si la suite sera plus élaborée que ce premier tome: En bref un roman qui se lit vite avec des personnages légèrement caricaturaux mais dans lequel la tension ne descend pas: Whilst on her journey she ventures a little too far and ends up splat bang in the epicentre of wolf city: There she accomplishes the unthinkable and seals her fate linking herself to 5 alpha males and activating an ancient moon guardian prophecy. This is a beautifully written story in a fascinating world the author has created and the characters are well developed: Katlyn (a hated human) is dragged to the High Moon Ceremony (a sacred mating ceremony) where she angrily absorbs the Moon Goddess Orb and finds herself mated to 5 alphas: Katlyn is strong resilient and fearless and plans on teaching the wolves the error of their ways. Loved this book and anxiously waiting for the next in series to see how this adventure will progress: Had I known that I would benefit from reading the Fortune Academy series first I wouldn't have started this when it came out. I'm a glutton for rejected mates and this had my name written all over it so of course it went on my wishlist long before it released: And my luck it would be my first endeavor into JR Thorn's writing, It moves quickly and there is a bit of heat towards the end: I enjoy Katlyn overall but I'm hoping her character develops more in book two as it felt like even being in her point of view she was a little flat, The initial drive of the why she ventures further into wolf territory does not sit right with me, I know that there's something else going on and I'm not sure how I feel about the whole thing. I also could not tell you the difference between any of the mates at this point other than Kane: You don't get enough of them or their POVs for an opinion or favorite. Paranormal Romance Katlyn is a human living in a world where wolf shifters are the superior race. Unfortunately one of the alpha wolves catches her scent and drags her to the ceremony, Now she is on the run from 4 alpha's who want to destroy her. She gets some unexpected help but can she trust the wolf shifters? Paranormal Romance First reread - 3rd of March 2023: This was just as good the second time around. I really love this world and the characters and I can't wait to finally continue this series, I love how it builds up from special flower picking under the moonlight to interrupting a sacred mating ritual and setting off a chain of

events that can't be undone: Kane is my favourite so far but I'm excited to see the grovelling the others will have to do it'll be so fun. As a big fan of crossovers the ending got me really excited to see what would come next: I have time to read the other books in the world by the time book two is out so I'll get on that soon: So what should I do now? Anyway I'm going to start looking for more rejected mates like this one. Paranormal Romance I broke the pact and now I'm stuck with five sexy mates: They've been careless of the side effects caused by their little territory battles. But they'll care now because I have all of their magic in the palm of my hand: The Goddess Crescent was supposed to be a myth the power to turn a human and unite the major clans: I just didn't expect it to bond me to an Alpha from each of the five packs and now I'm afraid I bit off far more than I can chew. comGet a free book when you join the Newsletter! {site_link} USA Today Bestselling Author J, comGet a free book when you join the Newsletter! {site_link} {site_link}.

. I absolutely LOVED this book!! Beware. Paranormal Romance The author's books are too short. I mean there is way too much missing info. I have no idea what the main character looks like. She was. But it's all very one dimensional. Malheureusement pour elle ils vont tous avoir envie d'elle.R. Thorn is Book 1 in the Crescent Five series. She is now hunted as the wolves want her dead. Highly recommended. Received an ARC and this is my voluntary review. Paranormal Romance Not amused with that ending to be honest. But it's my own fault.This is a reverse harem paranormal rejected mate novel. Humans are prey and are usually killed. Katlyn angrily absorbs the moon goddess orb. Original review:This was so intense. And the world building? Amazing. Paranormal Romance WHY IS THIS SO SHORT? I demand more.Wolves aren't supposed to mate humans. Do the wolves think twice about consequences? No. They have never cared about us. Literally.R. Thorn is a Reverse Harem Romance author.)Be sure to stop by J.R. Thorns Website: {site_link} www.AuthorJRThorn.R.
